

Science Bio Box

AT-0149

Designed for easy installation onto research submersibles or ROVs, the rugged and durable boxes facilitate the collection of subsea artefacts and biological samples from depths up to 6,000m

Configurable to customer and mission needs, and currently available in two sizes, the boxes include removable divider inserts for additional flexibility of internal compartments

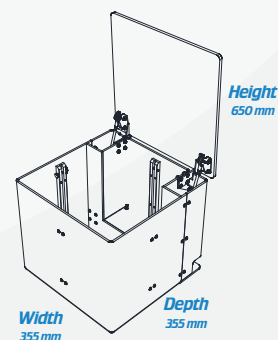

Key Features

- Hydraulic-operated lid via two stainless steel cylinders
- Swagelok hoses and fittings as standard
- 4x M8 mounting holes for submersible/ROV installation
- Rugged aluminium construction; hard anodized black
